

Combine the strength and durability of steel casework construction, with the warmth of wood door and drawer fronts. This is perfectly suitable for environments where both appearance and function is essential. Available in either Inset or Overlay design with a wide variety of stains and veneers to match your laboratory environment.

### Maple Veneer

#### Panel Construction

- Maple Veneer door and drawer panels are plain sliced, with grade "A" front and grade "1" back on a 3/4" thick particleboard core. Edges are banded with 1/8" hardwood maple. Other edge banding is also available. MDF and combo core are available options.

### Oak Veneer Panel Construction

- Oak Veneer door and drawer panels are plain sliced, with grade "A" front and grade "1" back on a 3/4" thick particleboard core. Edges are banded with 1/8" hardwood oak. Other edge banding is also available. MDF and combo core are available options.

# WOOD VENEER FRONTS

**Wood Veneer Options** - We can provide a wide range of wood veneers in various cuts, matching and sequencing options. We offer a variety of stains and custom staining to match existing casework.

**Drawer Body Options** - Drawers are available in powder coated cold rolled steel, powder coated galvanized steel and stainless steel.

**Drawer Suspension** - Several different drawer suspension systems available including 100# nylon tire self closing, 100# full extension, 150# full extension and 200# full extension for heavy-duty requirements. Full extension provides full access to all corners of the drawer.

**Quality Hardware** - Five knuckle and self-closing European style hinges and a wide selection of handles available to meet specific aesthetic and functional requirements.

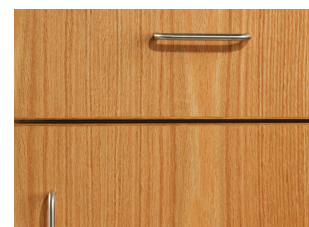

**Full Range of Cabinetry and Components** - For all of your needs wood fronts are available on our full range of cabinetry on either Inset or Overlay design.

### Environmentally Friendly Options

- For LEED® projects Mott can offer materials which will help you in attaining LEED® status.

**Cabinet Frame Construction** - Each cabinet meets SEFA 8 performance standards and is fabricated with quality workmanship using furniture grade cold rolled steel, galvanized and stainless steel are also available. All components are die formed, notched, welded and tightly fitted to provide maximum strength and rigidity.

**Vertical Grain Match** - All Mott cabinets feature vertical grain matching drawer and door fronts. Optional combination grain fronts an available option.

**UV Flat Line Finishing** - Our flat line finish system offers great chemical resistivity and emits zero volatile organic compounds (VOCs) using solvent-free UV coatings.
